# About Us

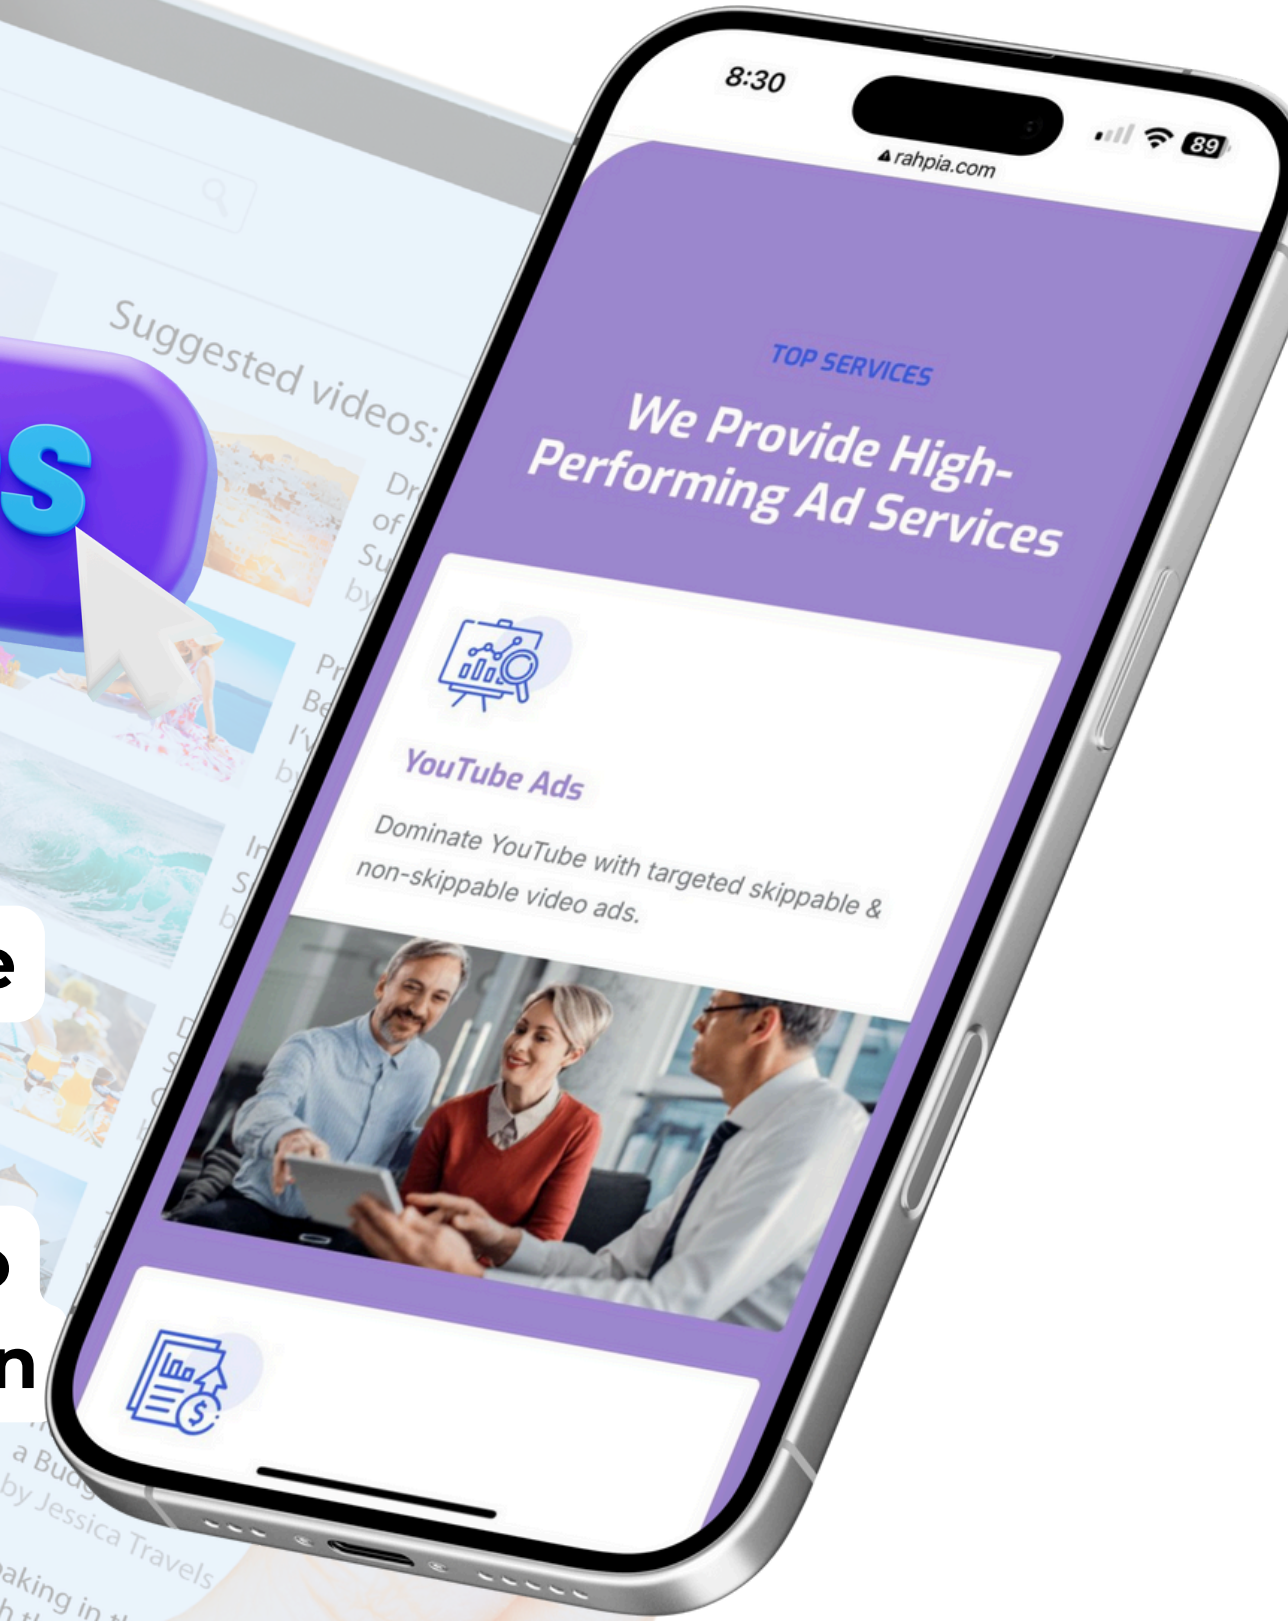

## World's Biggest Advertisement Company

Rahpia is a Dubai-based digital platform that connects real advertising with real users through daily video tasks.

We collaborate with global brands and OTT platforms, purchase ad slots, and distribute that ad revenue among users who complete short, branded video tasks.

Our model ensures that every task done by users contributes to actual brand visibility - making Rahpia a trusted bridge between advertisers and digital audiences.

By combining professional ad networks, AI-driven ad distribution, and a fast-growing global community, Rahpia is setting a new standard in digital task-based income.

## How Does This Work?

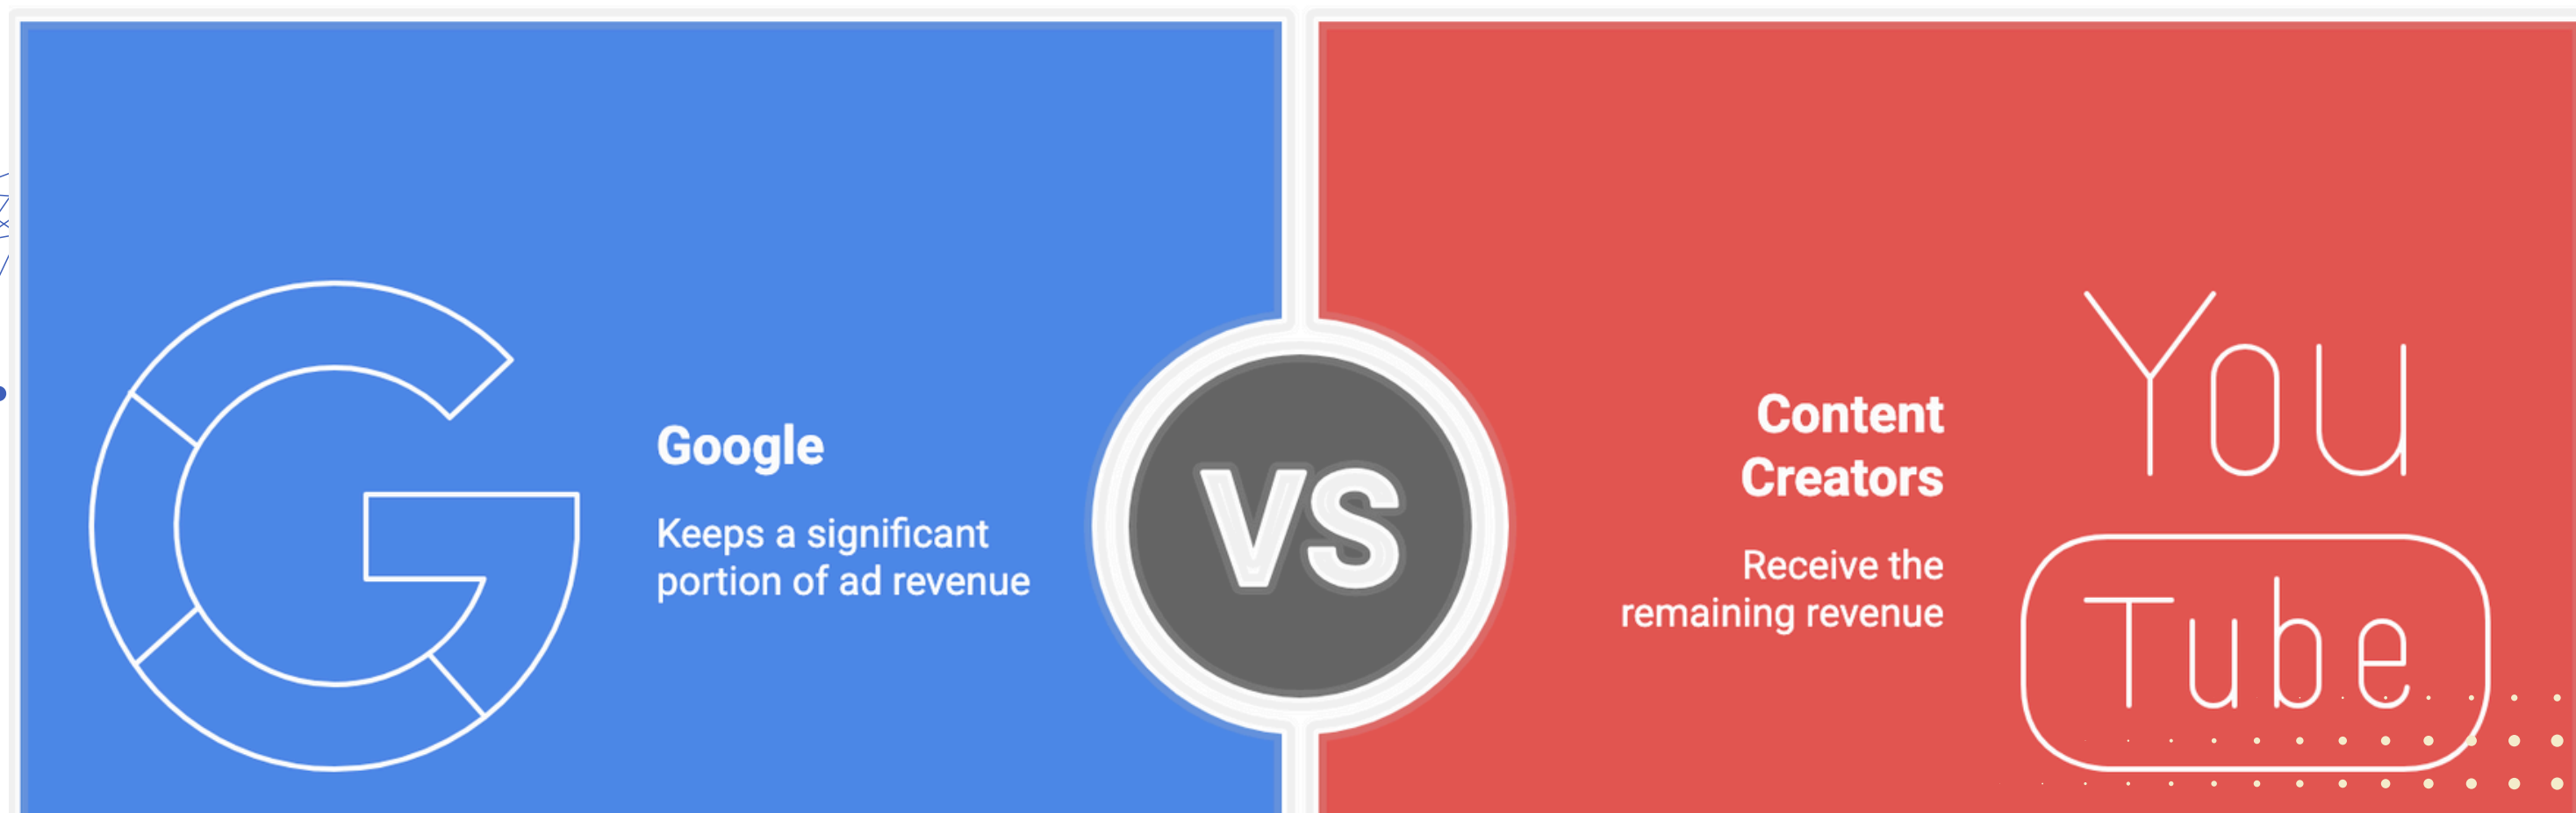

**Example: When you watch a YouTube video and see an ad:**

**The advertiser pays Google to show that ad.**

**Google keeps a portion of that payment (Around 45%) and  
pays the rest to the content creator.**

**This is how Google & creators both earn from ads.**
